COMPUTER SKILLS

- OPERATING SYSTEM Good knowledge of operating systems and its components. I studied in detail real time systems
good level
- PROGRAMMING LANGUAGE/CODE c, c#, c++, Java, Javascript, Kotlin, python, SQL
Also able to develop concurrent programs
advanced level
- PROGRAMS/SOFTWARE Full stack developer for web, mobile and desktop applications. I already gained some experience in developing software, on my own and in group projects
advanced level

DATABASES	Able to design and maintain databases, write complex queries, connect to remote databases and analyze data advanced level
GRAPHICS	I attended a course about UI usability and UX. My final thesis is focused on the usability of a real system and the redesign of its interface good level

PERSONAL SKILLS/OTHER SKILLS

I have practiced athletic at a competitive level since my childhood; growing up, I specialized in the 400m. Practicing this sport has taught me self control, discipline and dedication.

I play chess during my free time and I reached a 1950 ELO on Lichess. I joined the chess team at the Politecnico di Torino and participated in several tournaments.

I took piano lessons for 7 years and passed the pre-academic examinations at the Conservatorio. I had to stop studying piano when I came to university because it took me too much time and was not compatible with my new duties.

I developed extremely good teamwork and communication skills by working on many graded team projects and exams, with diverse groups of people.

In my future, I hope to work in the field of software development

OTHER INFORMATION

Available to travel on business in Italy, abroad

Available to relocate in Italy, abroad

* Fields marked with an * are certified by Politecnico di Torino, while the potential thesis description is added by the candidate.
